

Beginning in 1978 New Hampshire Bindery which Bogside Publishing is a subsidiary of, started binding Field Books for the surveying industry suppliers. In recent years many Companies have chosen the path of having their product produced abroad, resulting in lower quality standards, sub-par performance and lengthy time delays with shipments. Bogside Publishing proudly announces that our product is printed and bound in the United States. Through the many years we have helped with the concept, design and marketing many of the books you the consumer are purchasing today. With this lengthy background we are proud to offer you a full range of Water Resistant Engineer & Survey Books. Manufactured with rugged durability, and all the technical information required to perform your job.

Your brand, our books.
