

Personal Cooling Products

NECK BAND

ColdRush[®] personal cooling system from HexArmor[®], made with eVapora[™] technology, is a quick absorbing material which retains moisture and slowly allows it to evaporate, creating a cooling effect on the skin. Made for high temperature work environments or extreme physical activity, ColdRush[®] will keep you and your workers cool all day long.

Personal Cooling Products

NECK BAND

Throw one around your neck to enjoy hours of cooling action. When it begins to feel warmer, simply flip it over to the cooler side, just like your pillow.

Features:

- Size: 1.75" x 31"
- eVapora™ cooling technology wicks away sweat
- Heavy duty snaps
- Lightweight
- Machine wash, air dry

Additional colors:

LIME 30301 PINK 30303

How ColdRush® Works:

Our eVapora™ fabric technology quickly absorbs moisture up to eight times its weight, retains it, and allows it to slowly and naturally evaporate, which produces a cooling effect on the skin for hours. The result is cooler and more comfortable workers. Once in contact with the skin, ColdRush® continually wicks perspiration away and stores it in microcavity moisture reservoirs, which provide up to four hours of active cooling.

How to Use:

- Soak in water for 30 seconds or until saturated, ring out excess water, and place directly on skin
- When the cool effect fades, re-wet and reuse
- Cooling lasts up to four hours
- When dry, do not tear or pull apart
- Store dry
- Machine wash, air dry, do not bleach

Apply water to eVapora™ material.

Material absorbs and retains moisture.

Retained moisture and air flow provides continuous cooling action when in contact with skin surface.
